Alisha Gonsalves

Senior Product Designer · AI-first product and systems design

alisha.gonsalves27@gmail.com · linkedin.com/in/alisha-gonsalves · agonsalves.com

Senior product designer with 7+ years of experience shaping B2B content and platform products. I work AI-first and iterate quickly, turning customer feedback and complex requirements into clear, scalable product experiences, from research and prototyping through launch.

Skills and tools

Design: Product strategy · Interaction design · Design systems · Rapid prototyping · Content design

Research: User interviews · Usability testing · Research synthesis with AI

Tools: Figma · Sketch · Lovable · Conductor · Claude · Glean · NotebookLM · GitHub

Experience

HubSpot

Cambridge, MA · 2021–Present

Senior Product Designer

2023–Present

- Led design for an AI-assisted product that turns Reddit conversations into brand insights. Validated with 14 marketing leaders and shipped to public beta at 32% activation.
- Integrated AI into the design workflow, cutting prototype time from weeks to days.
- Pushed content design changes as pull requests straight to GitHub, tightening engineering handoff.
- Designed a distraction-free focus mode for knowledge base writing, with a quick switch to module mode for reusable blocks.

Product Designer

2021–2023

- Gained $169K net-new ARR by moving the standalone Knowledge Base onto HubSpot's content platform through a two-phase plan that joined business and engineering priorities.
- Designed knowledge base features that hit 13.6% activation in 90 days, 58% above goal.
- Built a GitHub bug testing process for designers, helping engineers fix bugs faster.

Associate UX Designer, CentralSquare Technologies

Lake Mary, FL · 2019–2021

- Ran qualitative research, user interviews and usability sessions, to validate design direction.
- Set up product tracking in Pendo to see how features performed, where users dropped off, which features went unused and which tasks users did most.

UX Graduate Assistant, University of Maryland

College Park, MD · 2018–2019

- Ran usability tests and reported user feedback to guide design improvements.
- Co-authored a usability issues report pairing each issue with a proposed fix.

Business UX Analyst Intern, Experian

Costa Mesa, CA · 2018

- Audited an internal tool for usability and prototyped improvements.

Education

Master of Information Management, University of Maryland — 2019

Bachelor of Engineering in Information Technology, Symbiosis International University — 2016
